

Associate

We are seeking an experienced candidate for a senior appointment, reporting directly to the Partners, with a strong working knowledge of development planning (transport) with proven project management skills, ideally with a record of managing and developing commercial client relationships and with around ten years' post-graduate experience.

Applicants should have:

- Circa 10 years transport planning background in a development planning role.
- Sound technical skills/knowledge in the transport planning field (e.g. Transport Assessments, Travel Plans, access appraisals, highway design, modelling etc.).
- Technical knowledge and proficiency in all relevant industry software (e.g. TRICS, TEMPRO, Junctions 10).
- Experience in the successful delivery of multiple projects of varying scales and complexity, including the management/leading of project teams.
- Strong communication skills, including representing clients at meetings with stakeholders;
- Experience in attending public consultations and/or Inquiries.
- Experience of developing and maintaining client relationships and business contacts.
- Chartered Member of a relevant and recognised professional institution and ideally obtained or working towards CTPP (or equivalent) professional qualification (not essential).

This role provides an opportunity to take a more visible and higher profile role with a fast growing and highly successful business with the genuine potential for strategic involvement in developing the business.

Training is offered to all of our staff, including a bespoke mentoring programme and professional membership subscriptions.
